## Examen practico Entornos de Desarrollo

## **Matias Agustin Pennino**

Se añade la regla "Source code should be indented". Esta regla nos indicara si en el codigo hay alguna linea que no respete el espaciado que deberia tener. Para evitar errores agregaremos

esta regla al proyecto y en las opciones generales del ide

Como se puede ver hay 20 lineas de codigo que no respetan esa regla. Ademas las reglas sobre nombres de los metodos, variables locales y

## parametros, nombre de paquete y nombre de atributos tampoco son respetadas
